{ALL ABOUT ME}

Former marketing professional, now web developer junior with a new-found passion for front-end developing and the ability of getting my ideas come into life through a screen.

From my previous 5+ years international experience in marketing and tourism in Australia, New Zealand, Canada and Spain, I have learnt that everything is possible with a proactive, can-do attitude and hard work. After finishing an internship, I feel now ready to get hands on in this exciting industry and show what I am capable of.
